Zgemma Setup Guide

- 1) Download the version of Wooshbuild / Open ATV for your box from the website below.
- 2) <http://images2.mynonpublic.com/openatv/current/index.php?open=zgemmass>
- 3) Format a blank USB memory stick and extract the files to the stick so it shows zgemma as the first level folder on the stick.
- 4) Run through the instructions on the screen to setup the box accepting all the defaults.
- 5) Download the current WLTV / Primal Plugin from our website .
- 6) <http://wltv.me/apps/emigma2.ipk>
- 7) Format the USB memory stick and copy the ipk file above to the stick.
- 8) Insert the stick into the box.
- 9) A box will appear showing Install Extensions choose that and press ok.
- 10) Tick the box and press the green button on the remote.
- 11) Once completed choose menu and restart the box.
- 12) Choose menu, Primal TV and Check for Updates it will download the latest version of the plugin. Once completed reboot the box again.
- 13) Choose menu, Primal TV and enter the username & password in the relevant box.
- 14) Choose Add IPTV from the list and wait for it to add the channel groups choose green button to save and then red to close
- 15) Restart the box
- 16) Press menu and then choose plugins open EPG-Importer and choose the blue button called sources. Choose IPTV Bouquets EPG and highlight Primal TV make sure it has a green tick next to it and the use the green button to save.
- 17) Press the yellow button to import the epg data on the box this can take 5 mins to complete.
- 18) While in the EPG-Importer screen change the following settings using the left & right buttons
Automatic Import EPG – Enable
When in deep standby – Wakeup and import

Return to standby after import – Yes

Start Import after Booting Up – Always

Once finished press the green button to save and then exit back to the main screen

19) Press the EPG button and use the left and right buttons to choose the category

20) Finishing touches to make it look better, Open the EPG and press menu

Show Bouquet on launch – Yes

Picture in graphics – Yes

That should be everything you need to get the box up and running with channels and a nice screen layout. Any problems let us know.

Kind Regards

Wonderland TV Team
